RAYCOMP II CUTS AD MAKE-UP TIME BY 50%. IT'S SIMPLY POWERFUL.

Raycomp II™ is a full page ad composition system designed especially for medium size newspapers.

It's a unique system, remarkably easy to use, yet loaded with powerful features.

In fact, Raycomp II can do so much, so accurately, in so little time, we're not surprised that some people have trouble believing our claims.

But the claims are true. And if you're a medium size newspaper you should know about some of them.

Raycomp II is incredibly fast.

State-of-the-art technology makes it at least twice as fast as conventional methods. For example, it can eliminate dozens of steps by allowing the operator to see and correct errors *as they occur.* So it's not only faster, it's more accurate, too.

Raycomp II is easy to operate.

For all its sophistication, it's basically a simple electronic tool. So simple, you won't have to hire a technician to run it. In fact, almost anyone can get the hang of it in just a few days.

Raycomp II is priced right.

Despite the system's enormous capability, it costs far less than you'd expect. Which is one of the reasons so many of them are hard at work in so many newspapers.

But you really have to see the Raycomp II to believe it. So if you'll get in touch with us we'll send you some literature and, at your request, set up a demonstration.

If you've already seen a demonstration, then you'll probably want a system. Either way, call (617) 443-9521. Or write "Raycomp II" on the back of your business card and send to Raytheon Graphic Systems
Dept. 29
528 Boston Post Road
Sudbury, Mass. 01776.
